THE COMPLETE OFFICE

Nexus is the obvious basis for new, dynamic office solutions. With three different types of tables you can furnish a complete office which effectively meets your employees' needs. From concentrated, individual work to creative project groups and meetings. Nexus tables can be easily varied and added to – during the working day or as the number of employees, working methods and premises change. A generous collection of materials and accessories makes it possible to create unique environments which express the personality of the workplace and your creative ideas. Combine with Kinnarps' solutions for partitioning, storage and sitting in a seamless and ready-made solution where all products work together.

The Better Effect Index
Sustainability grade

Nexus tables are a sustainable choice. As part of our sustainability work, The Better Effect, we have developed a product series which meets high standards in terms of raw materials and resources, climate, clean materials, social responsibility, reuse and ergonomics. We have used a high percentage of certified raw wood and strive for healthy environments without unnecessary chemicals and VOC (Volatile Organic Compounds) emissions. You can see how Nexus meets our sustainability requirements in different areas in The Better Effect Index tool at kinnarps.co.uk.

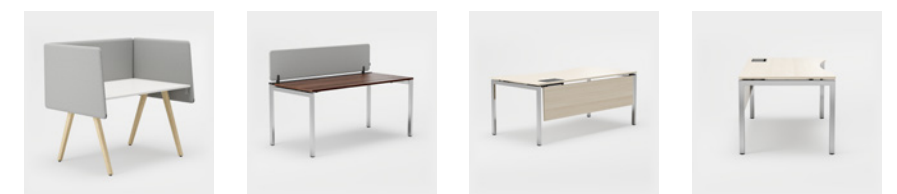

DESKS

**NEXUS DESKS CREATE THE CONDITIONS
REQUIRED FOR FOCUSED AND CREATIVE
WORK – INDIVIDUALLY OR IN A GROUP.
A WIDE RANGE OF SHAPES AND SIZES
MAKES THE TABLES EASY TO POSITION,
SO YOU CAN UTILISE EVERY SQUARE METRE.**

FOR ONE AND ALL

Nexus desks are based on the individual – with the option of choosing whether the table should be personal or used by many. The height can be manually adjusted between 65 and 85 cm for an individual fit. A thoughtful design produces a stable and vibration-free table which can handle the load of monitors and other equipment. The desks are connectable, which makes it possible to create work groups with several tables beside and opposite one another. This can also be complemented with additional tabletops to provide extra work surface.

DESKS

- 20 cm adjustable height range from 65 to 85 cm.
- Connectable tables and tabletops.
- Sliding top with quick-lock and cable tray gives a neat and tidy impression.
- Flexrail for easy customisation of workplace functions.

DIMENSIONS AND TECHNICAL SPECIFICATIONS

DESK Fixed height 740 mm, adjustable height 650-850 mm.

TABLETOP 23 mm, chipboard with wood veneer (oak, beech, birch, white pigmented ash) and solid lipping or laminated top (oak, beech, birch, light grey, white, grey white, grey oak, walnut, amouk) with lipping in ABS plastic. **UNDERFRAME** Two versions of leg assemblies for all tops with fixed height (740 mm) or adjustable height (650-850 mm). **OPTIONS** Tabletop cutout, panels, cable tray, cable tray mesh, cable lock, cable tidy, powerbox, CPU holders, desktop screen, divider, monitor arm, power socket and wireless charging unit. **DESIGN** Kinnarps Studio. **SCALE** 1:100 **UNIT** mm.

BENCHES

NEXUS BENCHES PROVIDE HIGH FLEXIBILITY IN WORKING ENVIRONMENTS WHERE NEEDS CHANGE QUICKLY. THE BENCH SOLUTION IS AS SUITABLE FOR AN OPEN OFFICE WITH FIXED WORKPLACES AS FOR PROJECT ENVIRONMENTS AND TEMPORARY WORKSPACES.

DYNAMIC WORKING ENVIRONMENTS

The point of a bench solution is that it is extremely easy to change and customise the workspace for a large workforce. Movable dividers mean that employees can choose how much workspace they want to work at for the moment and there are no support legs that can get in the way. Dividers and screens can be easily set up to create personal or common areas. Flexrail provides an optimum solution where screens, sockets and network outlets, as well as monitor arms, can be added and moved without restrictions.

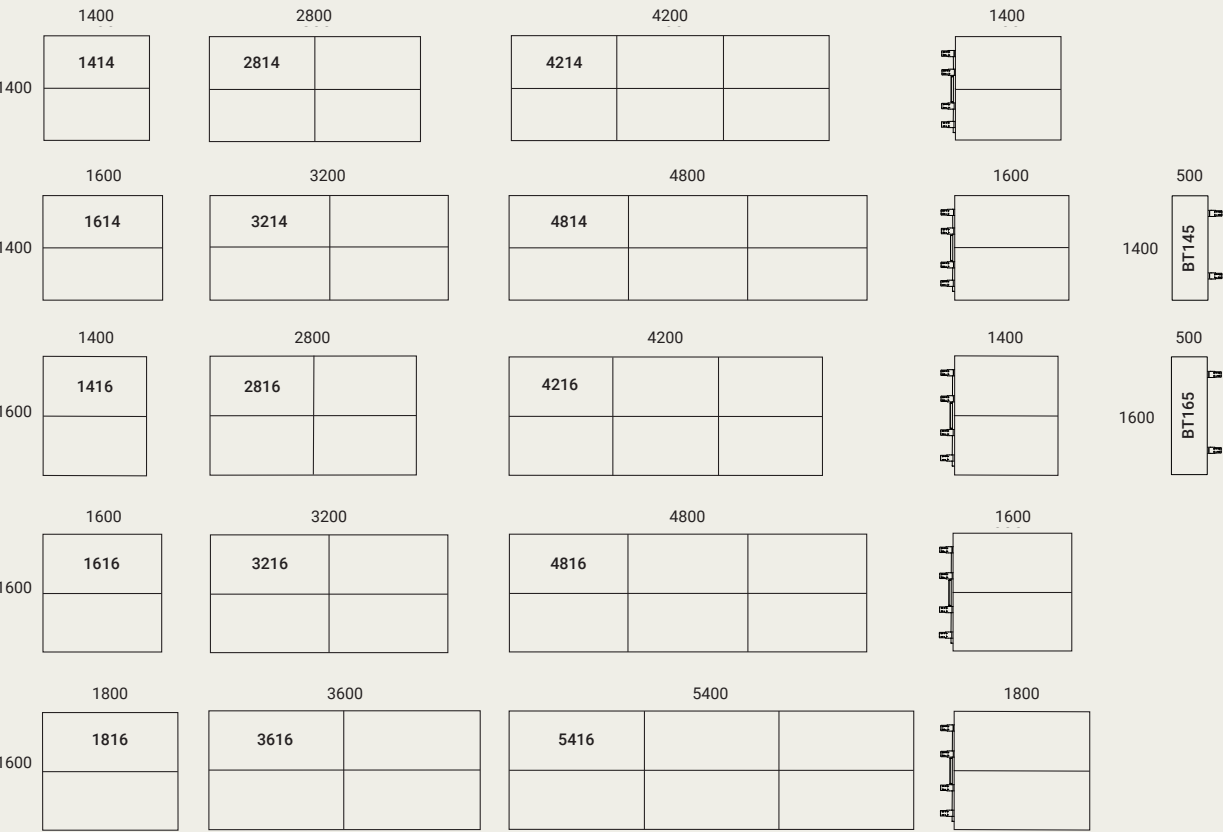

BENCHES

- Flexrail for easy customisation of workplace width and function.
- Option of adding extension top to the short end for an extra work surface.
- Sliding top with quick-lock and cable tray gives a neat and tidy impression.
- Vertical cable suspension for seamless connection to floor sockets.

DIMENSIONS AND TECHNICAL SPECIFICATIONS

BENCH SOLUTIONS Fixed height 740 mm.

TABLETOP 23 mm, chipboard with wood veneer (oak, beech, birch, white pigmented ash) and solid lipping or laminated top (oak, beech, birch, light grey, white, grey white, grey oak, walnut, amouk) with lipping in ABS plastic. **UNDERFRAME** Two versions of leg assemblies for all tops. MEETING TABLES

NEXUS MULTIFUNCTIONAL MEETING TABLES
LET YOU MAKE USE OF ALL OPPORTUNITIES
FOR GROUP CREATIVITY. FROM SPONTANEOUS
MEETINGS TO PLANNED PROJECT MEETINGS,
WORKSHOPS AND MORE FORMAL SESSIONS.

NEW WAYS TO MEET

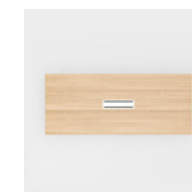

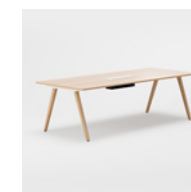

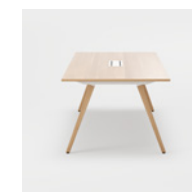

With two different heights, Nexus encourages different ways of meeting and communicating. 74 cm provides a comfortable height for seated work and longer meetings. 90 cm facilitates an active meeting style where you can vary between standing and sitting, making it easy to collaborate and share material. A wide range of tabletops makes it possible to customise the meeting place for a few or large numbers of people. Many of the tables can be connected, which allows unlimited design options, provided the floor is even. The tables can be fitted with the latest accessories in meeting technology.

WOOD AS A CONTRAST

A wide range of different wood veneers on the tabletops provides an opportunity to work with the room's expression and atmosphere. We introduce for instance white pigmented ash, which is available on all tables in the series. Nexus meeting tables are also available with wooden legs: choose between oak, beech or birch.

MEETING TABLES

Two heights: 74 cm and 90 cm.

Meeting tables are available with metal or wooden legs – oak, birch or beech.

The square meeting tables are connectable.

Future-oriented technology for meetings, audio and video, as well as power supply: conference electrics tidy or recess frame with interchangeable connection modules.

FUNCTIONS & OPTIONS

NEXUS IS A TIMELESS INVESTMENT. SMART SOLUTIONS FOR TECHNOLOGY, AUDIO AND VIDEO MAKE IT POSSIBLE TO REPLACE FUNCTIONS AND MODULES IN LINE WITH DEVELOPMENTS AND YOUR NEEDS.

CONNECTION MODULE – MEETING TABLE
Nexus meeting tables give you access to innovative solutions for technology and communication. We have developed a connection module that allows you to replace network, USB and HDMI inserts when needs change or work colleagues swap equipment. The connection module is available in two lengths. The long variant has three variable sockets and four power sockets. The short variant has one variable socket and two power sockets. The connection module can be used in the conference electrics tidy and recess frame.

CONFERENCE ELECTRICS TIDY – MEETING TABLE
Conference electrics tidy with lid for concealed connection for electricity and communication. The conference electrics tidy is available in a long and short version and can be combined with our connection module in two different lengths.

RECESS FRAME – MEETING TABLE
Recess frame for neat, easily accessible connection for electricity and communication. The recess frame can be complemented with the short version of our connection module.

- Desk
- Bench
- Meeting table

SLIDING TOP ●● Conceals cables and plugs and provides a clean work surface that is easy to work at. Adjustable depth of 130 mm. Ball-bearing slides for more control and quick-lock for easy use.

CABLE TRAY ● Efficient handling of cables and plugs, which are held in place by the high edges at the opening. Cable tray matches the legs (silver, black, white) and is adjustable to two heights. Can be opened from two sides for easy access.

CABLE TRAY ● Spacious, adjustable cable tray (in silver) to store all cables and power sockets. Can be hooked off on one or both sides for smooth access.

EXTENSION TOP ● Practical extension top creates extra work surfaces or can function as a temporary workplace. The extension top is fitted on the outer leg assembly and can also be retrofitted.

LEGS – ADJUSTABLE HEIGHT ● Square shaped legs (50x50 mm in silver, black, white) with adjustable height (650-850 mm). Only fits Nexus desks.

LEGS - FIXED HEIGHT ●●● Rectangular shaped legs (30x50 mm in silver, black, white, chrome) with fixed height (740 mm). Fits all Nexus tables.

TIMBER LEGS ● Nexus meeting tables are available with timber legs (740 mm) in oak, birch or beech.

PANELS ● Well-designed panels in veneer, laminate or metal which match the finish of the legs and tabletop. Fitted under the tabletop.

CONNECTING LEG FRAMES ●● Connecting leg frame for Nexus benches and meeting tables (standard when four or more tables are linked). For easy cable management a spacious vertical cable tidy is included and is height adjustable. Matches the colour of the legs (silver, black, white).

CONNECTING LEG FRAMES ● Connecting leg frame for Nexus desk. Used to connect 800 mm deep tables lengthways. Available in silver, black, white.

CABLE TIDY ●●● Practical cable tidy made of steel which you can fasten with a magnet on any of the table legs. Matches the colour of the legs (silver, black, white). Can also be retrofitted.

CABLE TRAY MESH ●●● Cable tray in black mesh which gathers and conceals cables. Fits all tables in the Nexus range.

OVAL TABLETOP CUTOUT ●● Tabletop cutout for installing monitors, monitor arms and other accessories, also works for cable management. Up to three oval tabletop cutouts per tabletop, including edge cutouts and a swivelling plastic cover.

TABLETOP CUTOUT WITH LIPPING – BENCH ● Tabletop cutout for Nexus bench, which is placed in the centre of the tabletop. Used for accessories and managing cables. Lipping which matches the colour of the tabletop for a uniform look.

POWERBOX ●●● Gathers sockets for electricity, data, USB and cable clamps in a neat and easily accessible solution that can be closed when not in use. Especially practical if the desk is placed against a wall or where two desks are positioned back to back with a screen in between. Available in several versions.

CABLE PORT WITH POWER SOCKET ●●● Great functionality on a small surface. Cable port with a power socket and holes for four cables.

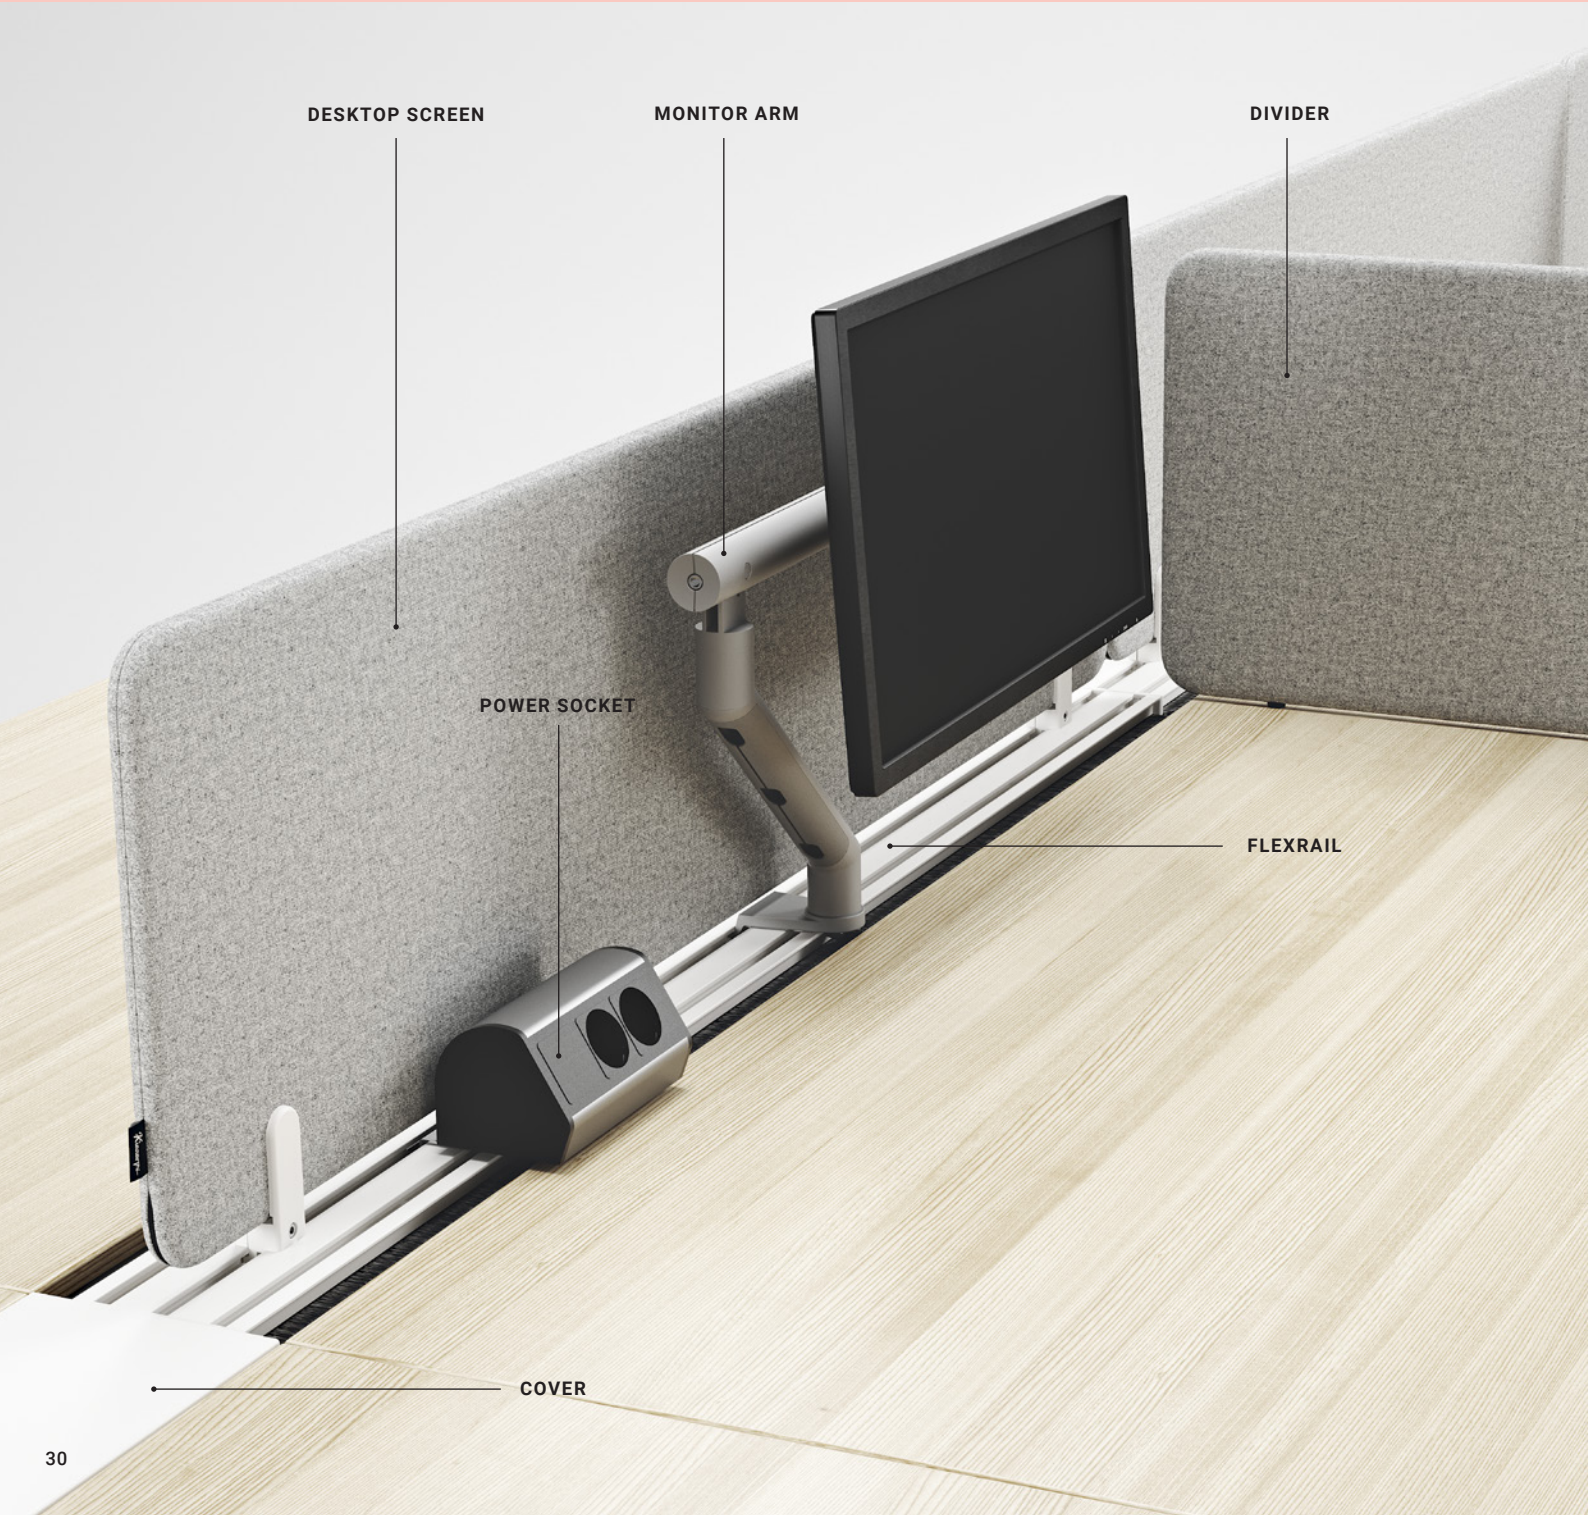

WIRELESS CHARGING UNIT ●●● Easy, wireless charging for Qi mobile phones.

CABLE GROMMET ●●● Practical cover that hides but also provides quick access to cables.

FLEXRAIL

Flexrail helps you design your office as you want it for the moment. Flexrail makes it easy to customise the workplace so you get more personal work surface or space for more employees. You can go from individual work to group and project work in only a few minutes. Flexrail is based on a rail system that is integrated into Nexus desks and benches. It can be fitted with a desktop screen, divider, power socket and monitor arms that can be moved sideways, allowing you to quickly and easily change the set-up, so that the workplace meets your needs. It is also simple to remove and add new accessories. The cover available as an accessory allows you to hide the rail and create a larger work surface.
